

CANADIAN PROFESSIONAL GEOSCIENTIST AWARD

Terms of reference

The CCPG award was established in 2005 to recognize outstanding contributions to the development and/or practice of professional geoscience by an individual who advances public recognition of the practice of professional geoscience in Canada.

Nominations are sought annually in the late fall, for selection in winter and presentation in the spring. The award is intended to be presented at the home association of the award winner. The presentation would be done by the CCPG President or designate.

The award consists to a labradorite marble sculpture made by a Canadian artist.

The Canadian Professional Geoscientist Award

The award does not have to be conferred on an annual basis.

General information

Eligibility

- ❖ The candidate will have demonstrated a solid professional career with outstanding service to the community, along with their dedication and commitment through countless hours of volunteer work on behalf of one of the Constituent Associations or to the CCPG.
- ❖ He or she must be registered as a professional geoscientist in a Constituent Canadian Association at the time the nomination is proposed.
- ❖ The Award is normally given to a person in mid-to-late career, who has been around long enough so he/she has the reputation and opportunity to make an outstanding contribution to the professional and technical community.

- ❖ Candidates who have retired and are therefore no longer practicing are also eligible.
- ❖ Current members of CCPG Council are excluded from receiving the Award.

Nominations

The Nomination has two parts:

1. Nominating Form: Filled in by a Constituent Association and signed by up to 5 members of any Constituent Association in good standing. **Nominations are officially sent by a Constituent Association Officer.** Only one nomination per Constituent Association per year.
2. Letter of Support: This should provide a summary in plain language of why the person is being nominated, addressing the following points in language which crosses geoscience boundaries and communicates why this person's contribution is significant:
 - a. Summary of involvement to the Constituent Association;
 - b. Academic background (post- secondary only);
 - c. Career profile with a summary of areas of achievement or distinction;
 - d. Brief career path summary in chronological detail, which should be verifiable. This should highlight unique or otherwise significant accomplishments, current areas of work/interest, important publications, etc.;
 - e. Involvement in other technical/professional societies. All acronyms should be spelled out;
 - f. Community involvement: if applicable. Organization names should be accurate;
 - g. Any additional information desired;
 - h. Closure: summing up why nominee deserves the award.
